

Hawaiian Village Curbstop Locate

To Begin Tuesday, September 26, 2023. The curbstop is the water shutoff from your home out at the water main. All homeowners in Hawaiian Village will have their curbstop located and put into the GIS. However, WE NEED YOUR HELP. Good afternoon everyone,

We would like to start the locating process Tuesday the 26th of September. We will start locating at 7809 Kona Cir and end at 7801 Molokai Dr. This includes Maui Circle and includes 41 homes. We will be locating Tuesday through Thursday for the first round.

It may not take the duration of all three days, but I feel it's a good start to get a feel what it's going to take us to complete this task. Grant Lipprand is your GIS locating tech who will be performing the locating and logging.

What residents must know: Place a flag outside the home where the drinking water enters the house. A good way to identify that location is where your water meter is located inside the home. Place the flag on Monday and leave the flag stationary until Friday or after 5pm on Thursday. (Flag color does not matter as long as its identifiable. If the home is not flagged or the flag is unidentifiable (cannot be found) the home will be passed by. If for some reason we cannot locate the curbstop, we will move on to the next house within a reasonable timeline. That home will be marked on our GIS mapping log as "missing" or "cannot be found". We will do our best! Probing with a thin rod will be done while locating, then a hole shooter shovel to confirm it's the actual curbstop that has been located. (sod will be peeled back at a minimum and laid back properly or the best the tech can do.) A courtesy flag will be placed by the tech so the homeowner can have knowledge of where their curbstop is. If you have any further questions, please call or email me.
